ON-SITE GUIDE

2025 - 2026

Analysis and Design for School Tournament Website

1. Project Overview

1.1 Purpose

This project aims to create a web-based tournament management system for schools using PHP, MySQL, and Bootstrap. It will serve as a practical lesson for students learning web development, database design, and full-stack implementation.

1.2 Scope

The system will:

- Display tournament information (teams, matches, standings)
- Allow viewing match schedules
- Automatically calculate team standings based on match results
- Provide a clean, responsive interface using Bootstrap

2. Database Analysis and Design

2.1 Current Database Structure Analysis

Tables:

1. teams - Stores team information

- Fields: id (PK), class_name (unique), points, goals_scored, goals_conceded
- Good normalization with unique constraints
- Includes calculated fields for performance metrics

2. matches - Records match results

- Fields: id (PK), team1_id (FK), team2_id (FK), team1_goals, team2_goals, match_date

- Proper foreign key relationships to teams table
- Includes date for scheduling

2.2 Strengths of Current Design

- Simple and straightforward structure
- Proper use of primary and foreign keys
- Includes unique constraints where appropriate
- Calculated fields reduce query complexity

2.3 Potential Enhancements

1. Add a status field to matches (completed, upcoming, postponed)
2. Consider adding a tournament table if multiple tournaments need management
3. Add created_at and updated_at timestamps for both tables
4. Consider adding a players table if tracking individual players is needed

3. Software Requirements Specification (SRS)

3.1 Functional Requirements

FR1: Team Management

- Display all teams in the tournament (teams.php)
- Show team statistics (points, goals)

FR2: Match Management

- Display all matches (matches.php)
- Show match results with team names (not just IDs)
- Group matches by date or status

FR3: Standings Calculation

- Automatically calculate and display standings (standings.php)
- Sort by points, then goal difference

FR4: Schedule Display

- Show upcoming matches (schedule.php)
- Option to filter by date range

FR5: Website Structure

- Consistent header/footer across all pages
- Responsive design using Bootstrap

3.2 Non-Functional Requirements

NFR1: Performance

- Page load times under 2 seconds for all queries
- Efficient database queries with proper indexing

NFR2: Usability

- Intuitive navigation between sections
- Mobile-friendly responsive design

NFR3: Security

- Basic protection against SQL injection
- No sensitive data requiring authentication

NFR4: Maintainability

- Clear separation of concerns (DB, presentation, logic)
- Well-commented code for educational purposes

3.3 User Interface Requirements

UI1: Common Elements

- Consistent navigation across all pages
- School/tournament branding in header
- Footer with basic information

UI2: Team Page

- Table view of all teams
- Sortable columns
- Visual indicators for top teams

UI3: Matches Page

- List of matches with team names and scores
- Grouped by date
- Visual distinction between past and upcoming matches

UI4: Standings Page

- Ranked list of teams
- Highlighting for promotion/relegation zones
- Display of key statistics

4. Educational Value Analysis

This project provides excellent learning opportunities for students in:

1. Database Design

- Understanding table relationships
- Implementing constraints
- Calculating derived data

2. PHP Development

- Connecting to MySQL
- CRUD operations
- Data processing

3. Frontend Integration

- Bootstrap implementation
- Data presentation
- Responsive design principles

5. Implementation Recommendations

1. Development Approach

- Start with database setup and sample data
- Implement basic pages first (teams, matches)
- Add standings calculation logic
- Finish with schedule and UI enhancements

2. Teaching Points

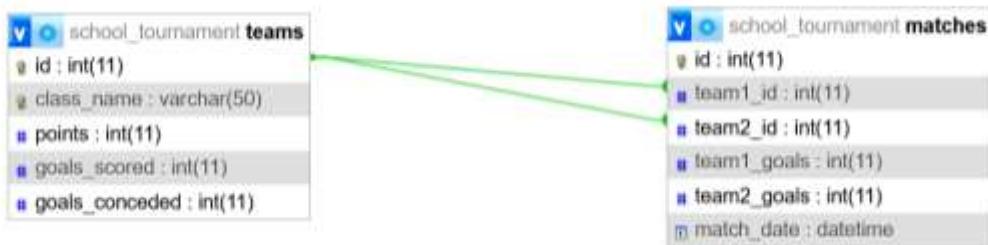

- Emphasize secure database connections
- Demonstrate proper query parameterization
- Show Bootstrap grid system implementation
- Highlight the importance of data consistency

3. Extension Possibilities

- Add match result entry form (for admin)
- Implement team logos
- Add player statistics
- Create tournament brackets

Database Design

Create Database (school_tournament)

Tables Structure

```
CREATE TABLE teams (
```

```
    id INT AUTO_INCREMENT PRIMARY KEY,  

    class_name VARCHAR(50) NOT NULL UNIQUE,  

    points INT DEFAULT 0,  

    goals_scored INT DEFAULT 0,  

    goals_conceded INT DEFAULT 0
```

```
);
```

```
CREATE TABLE matches (
```

```
    id INT AUTO_INCREMENT PRIMARY KEY,  

    team1_id INT NOT NULL,  

    team2_id INT NOT NULL,  

    team1_goals INT NOT NULL,  

    team2_goals INT NOT NULL,  

    match_date DATETIME NOT NULL,  

    FOREIGN KEY (team1_id) REFERENCES teams(id),  

    FOREIGN KEY (team2_id) REFERENCES teams(id)
```

);

Create Basic File Structure

Create Database Connection (db.php)

```
<?php  
$host = 'localhost';  
$dbname = 'school_tournament';  
$username = 'root';  
$password = ";  
  
try {  
    $pdo = new PDO("mysql:host=$host;dbname=$dbname", $username,  
$password);  
    $pdo->setAttribute(PDO::ATTR_ERRMODE,  
PDO::ERRMODE_EXCEPTION);  
} catch (PDOException $e) {  
    die("Connection failed: " . $e->getMessage());  
}  
?>
```

Create Header Template (header.php)

```
<?php include 'includes/db.php'; ?>
```

```
<!DOCTYPE html>  
<html lang="en">  
<head>  
    <meta charset="UTF-8">  
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
```

```
    <title><?= $pageTitle ?? 'Class Tournament' ?></title>
```

```
    <link  
        href="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/css/bootstrap.min.css" rel="stylesheet">  
</head>  
<body>
```

```
<nav class="navbar navbar-expand-lg navbar-dark bg-dark mb-4">  
    <div class="container">  
        <a class="navbar-brand" href="index.php">Class Tournament </a>  
        <div class="collapse navbar-collapse">  
            <ul class="navbar-nav">  
                <li class="nav-item"><a class="nav-link"  
                    href="teams.php">Teams</a></li>  
                <li class="nav-item"><a class="nav-link"  
                    href="matches.php">Matches</a></li>  
                <li class="nav-item"><a class="nav-link"  
                    href="standings.php">Standings</a></li>
```

```
<li class="nav-item"><a class="nav-link" href="schedule.php">Schedule</a></li>
</ul>
</div>
</div>
</nav>
```

```
<div class="container">
```

Create Footer Template (footer.php)

```
</div> <!-- container -->

<footer class="mt-5 py-3 bg-dark text-white text-center">
    <div class="container">
        <p>Class Football Tournament © <?php echo date('Y');?> </p>
    </div> <!-- container -->
</footer>
<script
src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.0/dist/js/bootstrap.bundle.min.js"></script>
</body>
</html>
```

Step 5 schedule.php

The screenshot shows a navigation bar with links: Class Tournament, Teams, Matches, Standings, and Schedule. Below it is a blue header bar with the text "Match Schedule". Underneath is a row of two buttons: "Upcoming Matches" and "Recent Results". A light blue box below contains the text "No upcoming matches scheduled yet."

```
<?php
$title = "Match Schedule";
include 'includes/header.php';

// Get upcoming and past matches
$upcomingMatches = $pdo->query("
    SELECT m.*, t1.class_name as team1_name, t2.class_name as
    team2_name
    FROM matches m
    JOIN teams t1 ON m.team1_id = t1.id
    JOIN teams t2 ON m.team2_id = t2.id
    WHERE m.date <= NOW()
    ORDER BY m.date ASC
")
```

```
JOIN teams t2 ON
m.team2_id = t2.id

WHERE m.match_date > NOW()
ORDER BY m.match_date ASC
")->fetchAll();
```

```
$pastMatches = $pdo->query("
SELECT m.*, t1.class_name as team1_name, t2.class_name as
team2_name
```

```
FROM matches m
JOIN teams t1 ON m.team1_id = t1.id
JOIN teams t2 ON m.team2_id = t2.id
WHERE m.match_date <= NOW()
ORDER BY m.match_date DESC
LIMIT 5
```

```
")->fetchAll();
```

```
?>
```

```
<div class="card mb-4">
